

# BRADWORTHY BI-FOLDS™

“Distinctive Quality”

Expand the boundaries  
of your home with  
Bradworthy Bi-Fold  
Windows and Doors

Bradworthy Bi-folds are built by Jennings Joinery P/L run by Neill and Ashley Jennings. It is a family business that originated in England and dates back well past the 1800 century from the town of Bradworthy in Devon.

With a tradition of family history of carpenters, wheelwrights and joiners you can feel reassured that the Bradworthy Bi-Fold you buy today will have the same Distinctive Quality Jennings Joiners have been producing for the last 200 odd years.

External bi-folding doors are typically used in residential homes to open up the family room to include the outside decking or paved court areas, providing an elegant and space saving gateway to the immediate external area.

Perfect for entertaining, family and friends.

Bradworthy Bi-Folds are designed to compliment your design and architecture requirements with elegant and functional custom fitted variations of door layouts covering widths up to 5.8 metres and windows covering widths up to 4 metres.

Layouts can include internally only or internally and externally opened doors, with single opening doors placed to suit our client's own requirements.

Bradworthy Bi-Folds are made exclusively from Western Red Cedar which has an exceptionally high dimensional stability rating, unequalled by any other timber used commercially in Australia.

Our windows and doors are sealed with 2 coats of either paint or stain in our factory before glazing and on site installation. We then insist that another two coats are then applied after installation, this will protect your investment in our doors.

By only using top quality stainless steel hardware and architectural grade aluminium alloy for handles, tracking, hinge pins, carrier pins and carrier bogeys, Bradworthy Bi-Folds have eliminated any potential premature wearing and ensure effortless use in-definitely.

To achieve a better thermal rating, reduce external noise levels and reduce the amount of UV rays penetrating your home, Bradworthy Bi-Folds are glazed with 6.38mm laminated glass, blocking out more traffic noise and providing increased strength and security over normal door standards.

## Bradworthy Bi-fold Windows and Doors

# BRADWORTHY BI-FOLDS™
